

The background features a dark gray field with faint, light gray line art. On the left side, there are several overlapping, curved lines that resemble a stylized profile of a human head or a series of concentric arcs. These lines are thin and delicate, creating a subtle, architectural feel.

INSPIRED

Inspired by modern architecture and intended to create more opportunities for physical activity, Modern City is a new approach to playground design. From the five-inch square steel tubing that towers 16-feet into the sky to the signature X-Hub aluminum shrouds that protect our patented connection system, Modern City is a visual statement for any park or playground.

With multi-tiered surfaces, challenging climbers and ground-level activities built right into the uprights, Modern City packs plenty of play in a compact design. It's a modern approach for modern cities at play.

PHILOSOPHY

What does an artistic play space look like?

It's an attractive, iconic, visual statement placed in a city park or a suburban green space. Designed to be aesthetically pleasing, it provides more play value per square foot than traditional post and platform systems.

DESIGN

What makes the play space innovative?

Its strikingly open feel invites the entire family into the play space. It utilizes larger than normal supports, a unique connection system and quality materials to assure extended product lifespan. In conjunction with beautiful lines, every detail of Modern City is designed to be functional, developmentally beneficial and most importantly - FUN.

SPECIFICATIONS

What does over 90 years of industry experience provide?

Backed by the industry's leading warranty, Modern City is crafted from durable materials to reduce long-term maintenance concerns. All steel support posts, stainless steel components and cast aluminum accents provide years of beauty and product performance.

MATERIALS

We designed a play system from the ground-up with materials and supports intended to provide strength, durability and style.

To ensure Modern City is equally at home in a rural greenspace or a vibrant city park, we selected durable, vandal-resistant and easy to maintain materials. Stainless steel and aluminum are the primary components, including the climbers, slides and connection hardware. Rotationally-molded plastic slides are also available in our full range of color options.

CAST ALUMINUM

Powder-coated aluminum caps and shrouds protect connection hardware and provide additional pops of color, creating a custom-designed sculptural look.

STRUCTURAL STEEL TUBING

Large 5" x 5" galvanized tubing offers the industry's leading structural support and durability.

WELDED WIRE MESH

Creates open lines of sight, adds contrasting colors to the slide platforms and encourages proper entry into the sliding area.

POLY BRAIDED STEEL CABLE

18 mm polyester-covered steel cable is larger and stronger and provides a comfortable hand grip for even the youngest users.

STAINLESS STEEL COMPONENTS

Tactile roller balls, visual mirror sphere, "larger than life" bolt with nut, and chain bridge floor feature durable stainless construction.

FEATURES

Every climber, surface and play activity of Modern City was thoughtfully designed to inspire active imaginations and to encourage physical activity. We leveraged nearly a century of play research and product development to create age-appropriate components that provide developmental benefits like social interaction, positive risk-taking, balance and coordination, and decision-making, and we captured all of this in a beautiful design for your park or playground.

CLIMBING DISCS

This modern take on stairs provides slight movement while climbing and promotes balance and coordination. The discs are at transfer height, and when combined with an accessible pathway, allow children of varied abilities to play together.

CHAIN BRIDGE

One of the most challenging climbers on Modern City, this stainless steel chain bridge allows children to gain confidence as they master "walking on air" to access the 8' slide or one of the many other climbers.

NUT/BOLT & MIRROR BALL

Constructed of heavy duty stainless steel, these tactile, hands-on play events add elements of discovery and learning to the playground.

V

Artistic, unconventional style

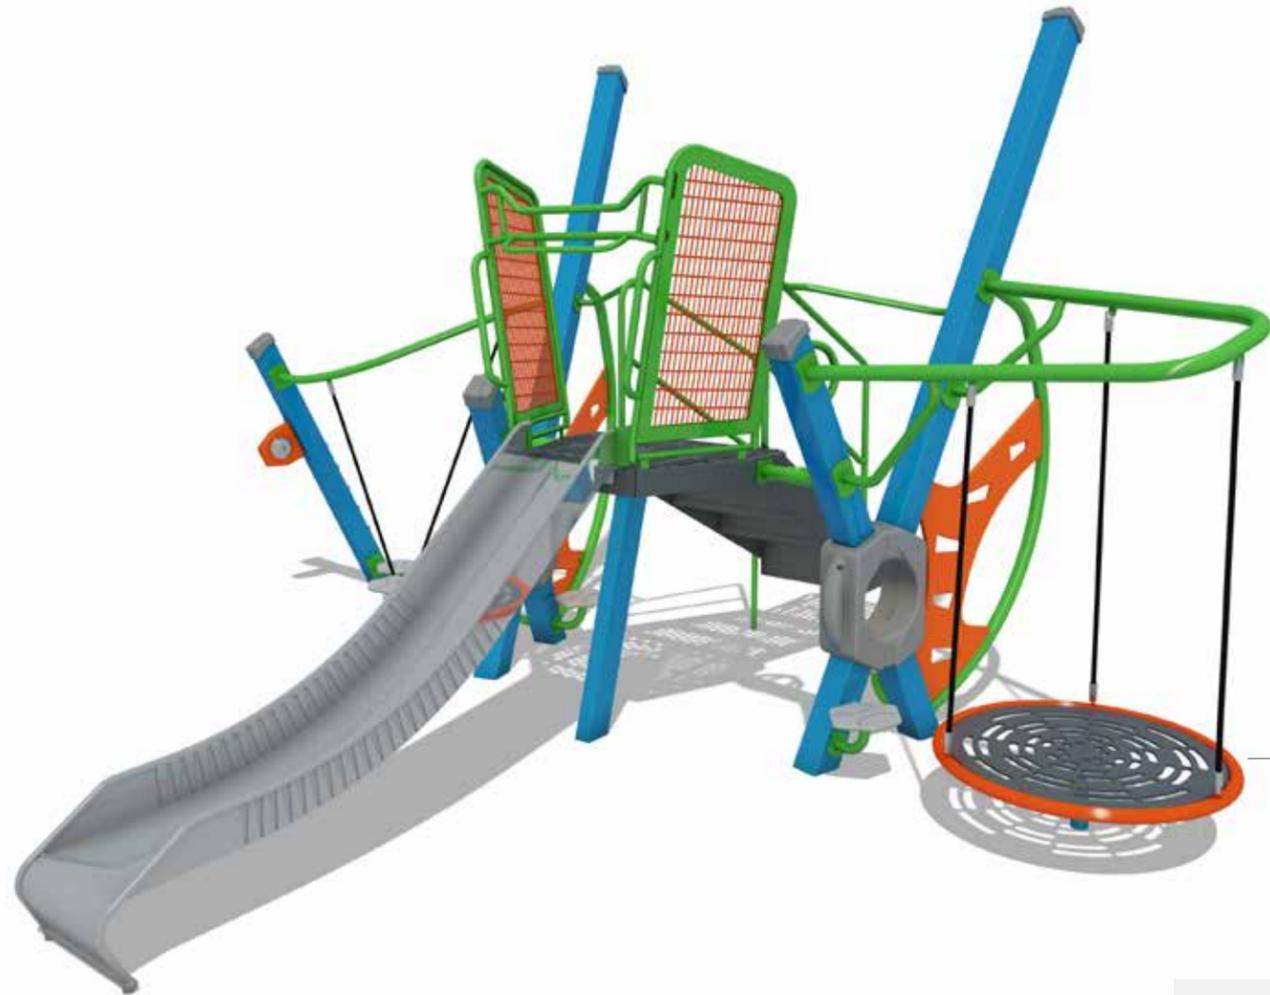

Age and developmentally-appropriate activities

Compact design, packed with play features

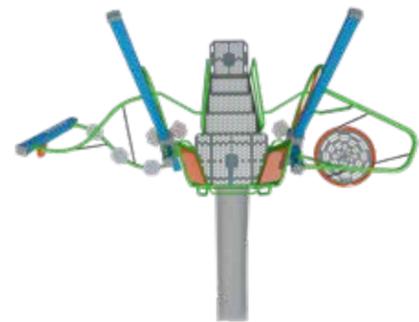

Modern City's V Series is perfect for the younger users, typically age two, three and four. With challenging, yet ability-developing climbing and balancing activities, children will gain confidence as they explore. Sliding and ground level discovery events add even more fun to this art-inspired play area.

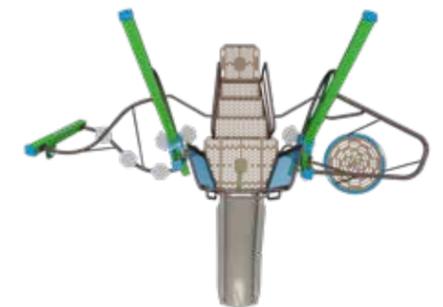

Special attention was given to ensure Modern City products could be used by children of all abilities. Spinners and climbing discs are at transfer height to create comfortable access.

MCV1SI | \$24,990
 ASTM Use Zone: 30' x 27'8" (9.1m x 8.5m)
 Child Capacity: 10-15
 Recommended Ages: 2 to 5
 ADA: Elevated: 3 Accessible: 5
 Ground: 4 Types: 5
 Fall Height: 4' (1.2m)

Multiple ground level activities and a transferable slide

MCV1RI | \$24,990
 ASTM Use Zone: 30' x 26'8" (9.1m x 8.2m)
 Child Capacity: 10-15
 Recommended Ages: 2 to 5
 ADA: Elevated: 3 Accessible: 5
 Ground: 4 Types: 5
 Fall Height: 4' (1.2m)

⚠ WARNING: Installation over a hard surface such as concrete, asphalt, or packed earth may result in serious injury from falls.

X

Architecturally-inspired design

Fully-climbable, multi-tier play area

Exciting option for older children

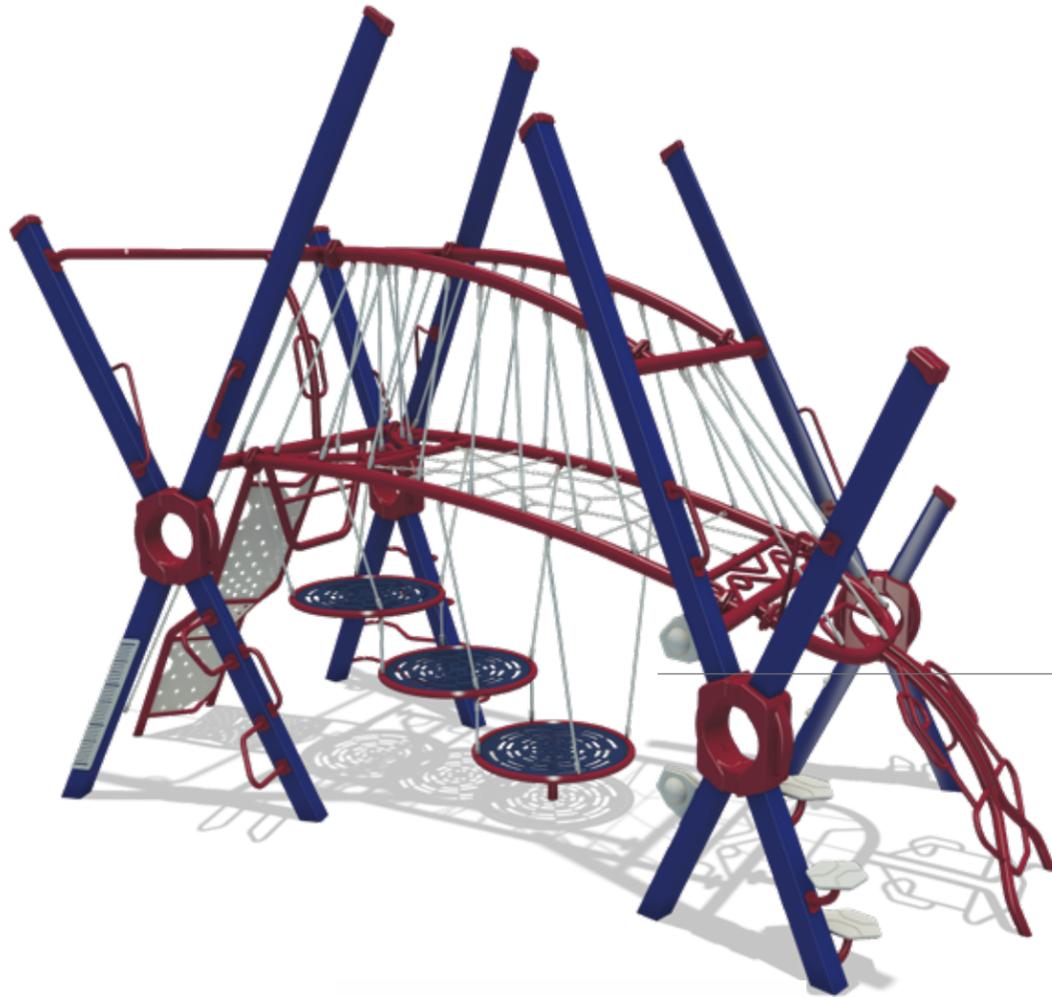

The X series offers a variety of climbing and spinning activities at accessible heights.

Combined with unique ground level play events, and several sliding options, Modern City X Series offers varying levels of challenge and activity for children of all abilities. Climbers are designed with multiple paths of travel to keep children engaged, ensuring returning visits to this diverse play space again and again.

Shown with optional connector for IONiX. Also available for Xscape.

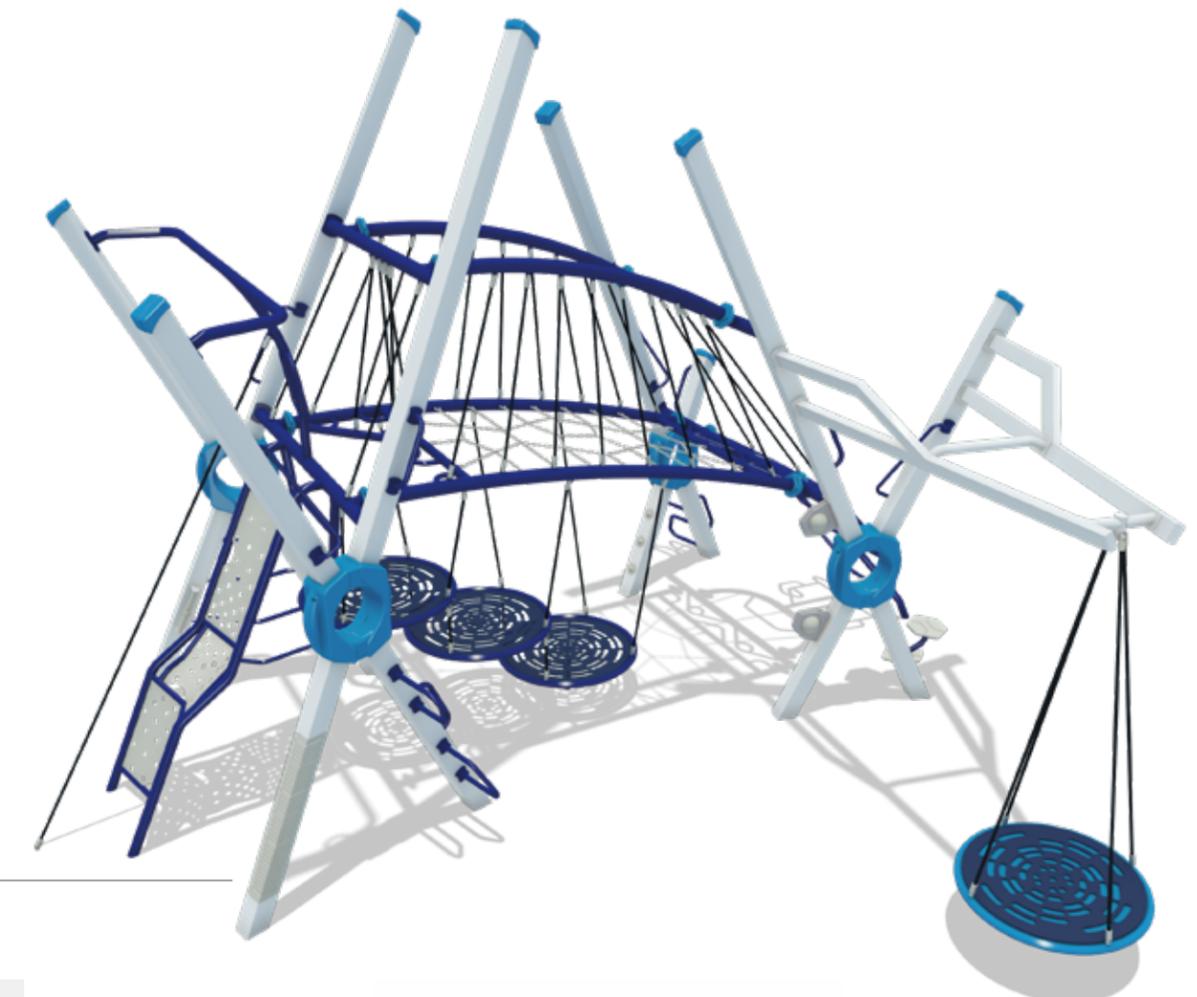

Maximizing play in the play space is important. Modern City has multiple layers of play, so more kids can get in on the action.

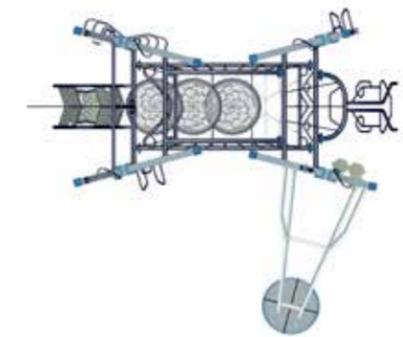

MCX1NI | \$52,998

ASTM Use Zone: 23'1" x 34'6" (7m x 10.5m)
 Child Capacity: 20-25
 Recommended Ages: 5 to 12
 ADA: Elevated: 0 Accessible: 4
 Ground: 4 Types: 2
 Fall Height: 8' (2.4m)

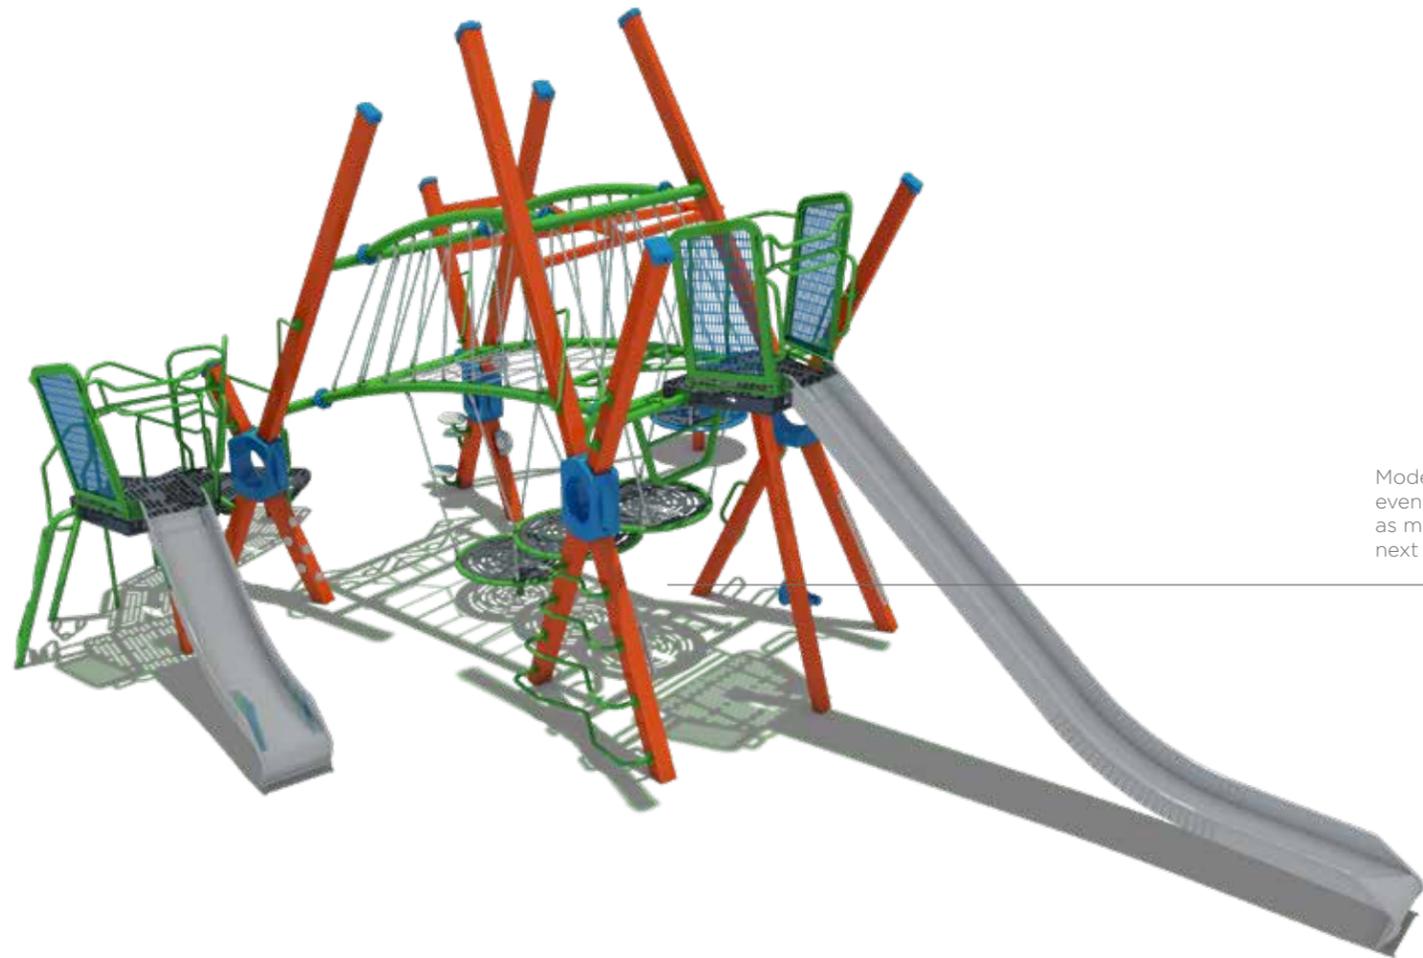

Measuring and other ground-level activities are built into the X-Frame uprights

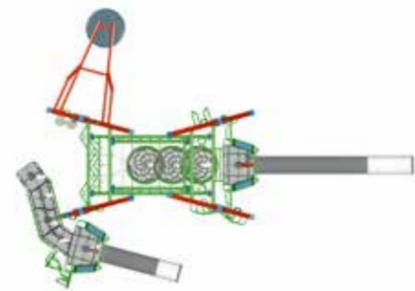

MCX2NI | \$59,998

ASTM Use Zone: 31'9" x 34'6" (9.7m x 10.5m)
 Child Capacity: 20-25
 Recommended Ages: 5 to 12
 ADA: Elevated: 0 Accessible: 5
 Ground: 5 Types: 3
 Fall Height: 8' (2.4m)

Modern City is completely climbable - even the uprights support play activity as multiple routes of travel to reach the next level.

MCX3SI | \$74,990

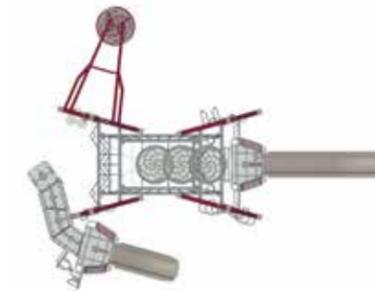

ASTM Use Zone: 36'7" x 47' (11.2m x 14.3m)
 Child Capacity: 25-30
 Recommended Ages: 5 to 12
 ADA: Elevated: 3 Accessible: 5
 Ground: 6 Types: 4
 Fall Height: 8' (2.4m)

Features heavy-duty supports, minimal hardware and hidden connections. All cables are single units allowing easy replacement in the event of wear or vandalism.

MCX3RI | \$74,990

ASTM Use Zone: 36'7" x 47' (11.2m x 14.3m)
 Child Capacity: 25-30
 Recommended Ages: 5 to 12
 ADA: Elevated: 3 Accessible: 5
 Ground: 6 Types: 4
 Fall Height: 8' (2.4m)

M

Designed for modular installations

Combine play activities for an exciting and challenging play space

Pairs with V and X Series

The M Series play events focus heavily on climbing, allowing children to master levels and routes, while creatively allowing new decision paths. This helps keep older children active outdoors for longer periods of time.

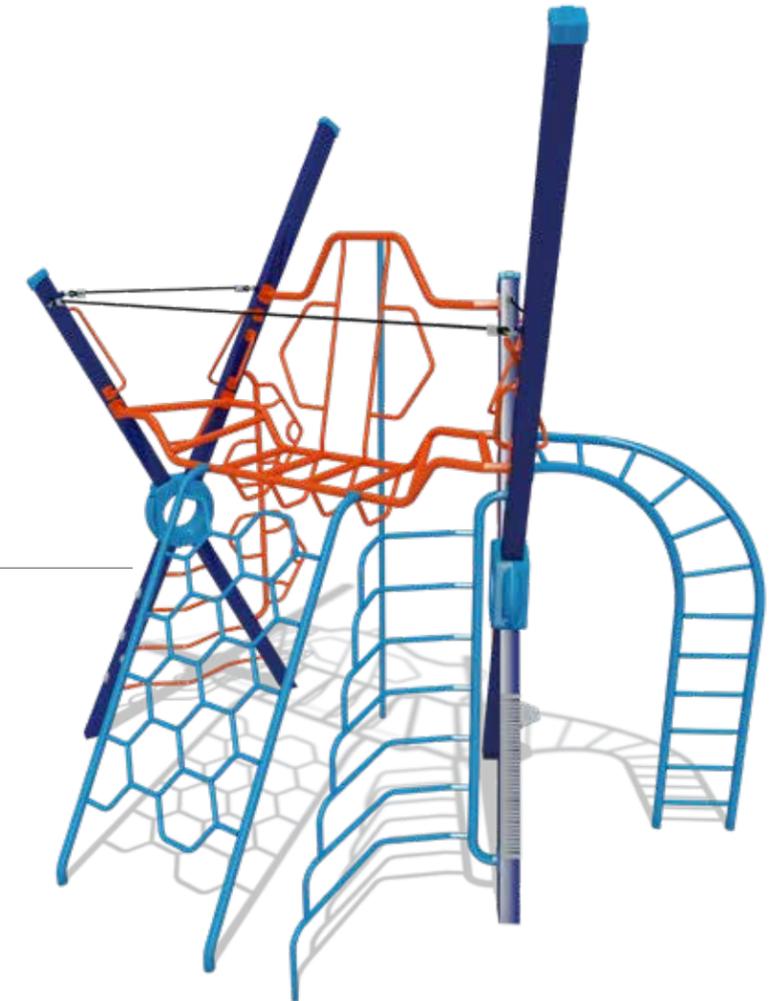

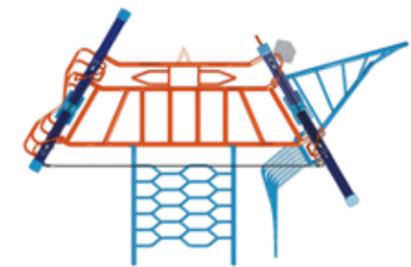

Multi-sided multi-user net climber can be installed alone or functionally linked with other Modern City products.

MCM1NI | \$31,949
 ASTM Use Zone: 28'1" x 22'11" (8.6m x 7m)
 Child Capacity: 15-20
 Recommended Ages: 5 to 12
 ADA: Elevated: 0 Accessible: 0
 Ground: 1 Types: 1
 Fall Height: 12' (3.7m)

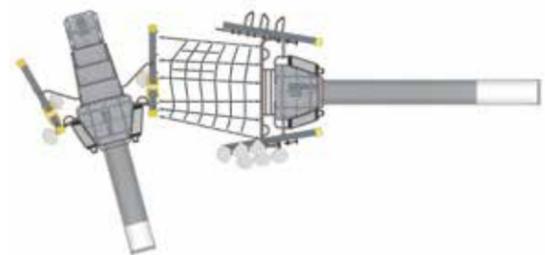

Multi-tiered climber with vertical, angled and overhead ladders for older children and/or advanced users.

MCM2NI | \$21,990
 ASTM Use Zone: 28'1" x 22'11" (8.6m x 7m)
 Child Capacity: 15-20
 Recommended Ages: 5 to 12
 ADA: Elevated: 0 Accessible: 0
 Ground: 2 Types: 2
 Fall Height: 9' (2.7m)

Design creates open sight lines and construction that encourages parental interaction for multi-generational play.

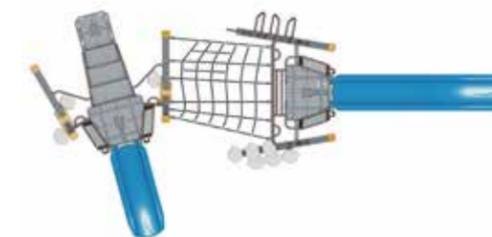

MCM3SI | \$44,999

ASTM Use Zone: 27'7" x 46'8" (8.4m x 14.2m)
 Child Capacity: 10-15
 Recommended Ages: 5 to 12
 ADA: Elevated: 3 Accessible: 1
 Ground: 1 Types: 3
 Fall Height: 8' (2.4m)

Multiple climber types at varying levels of challenge offer many different routes of travel throughout the play system.

MCM3RI | \$44,999

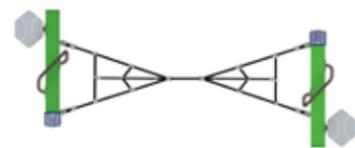

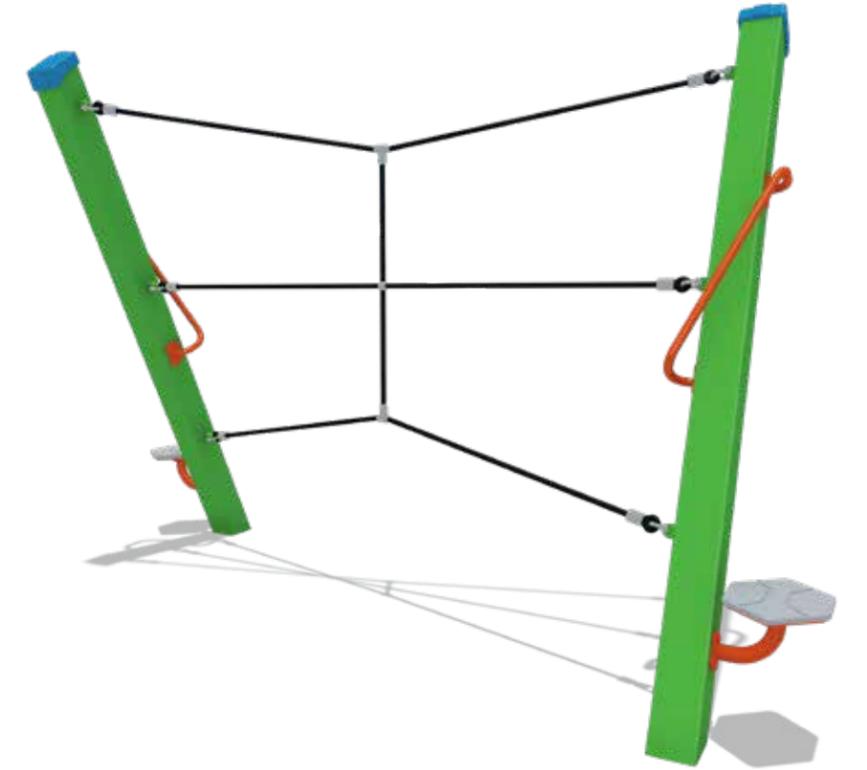

ASTM Use Zone: 26'11" x 44'11" (8.2m x 13.7m)
 Child Capacity: 10-15
 Recommended Ages: 5 to 12
 ADA: Elevated: 3 Accessible: 1
 Ground: 1 Types: 3
 Fall Height: 8' (2.4m)
