

LANDMARK
DESIGN

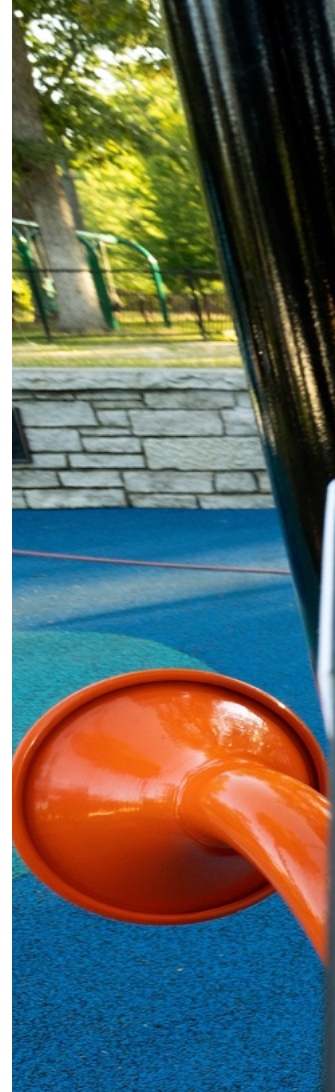

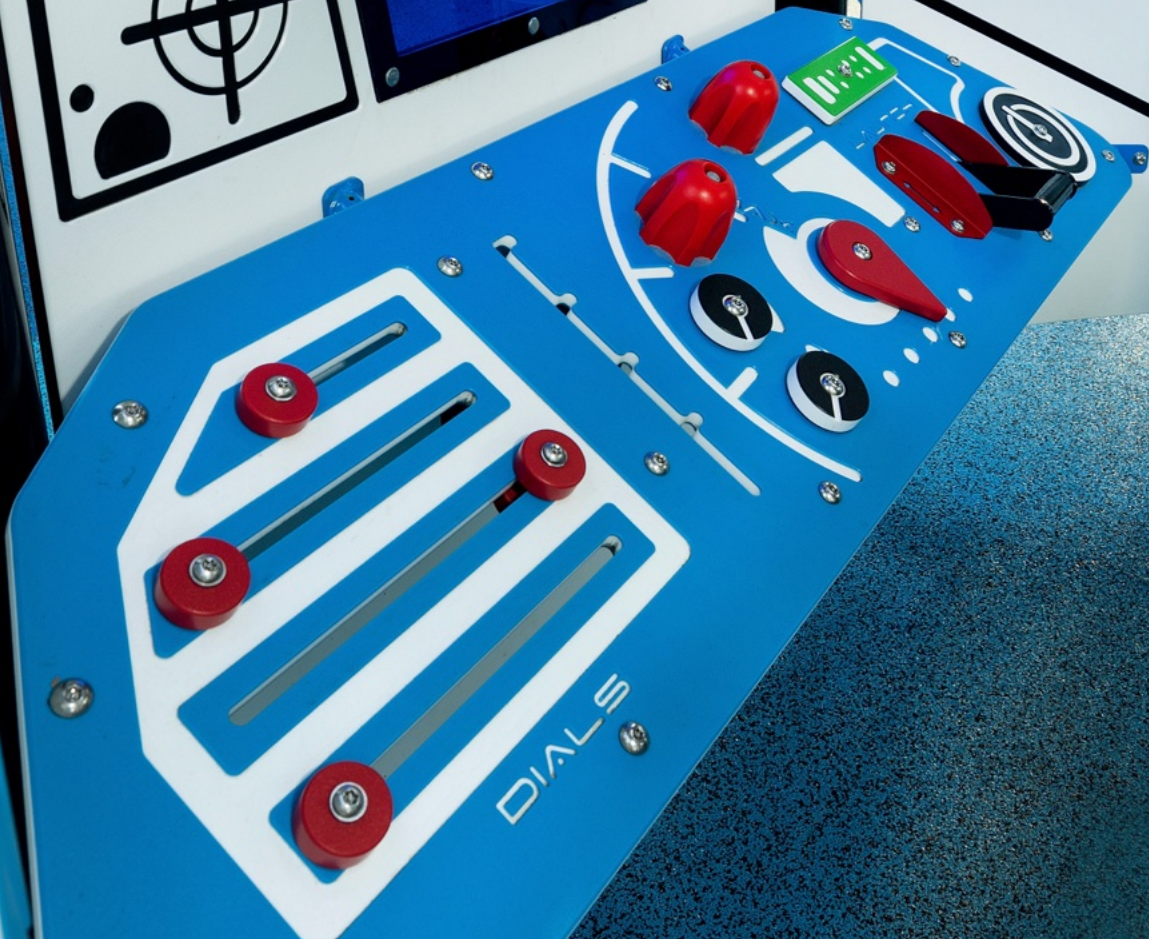

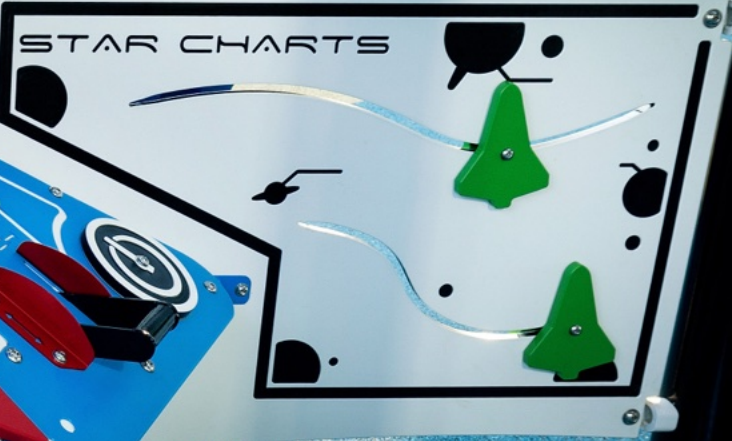

Build beyond the ordinary. **Be Extraordinary.**[®]

BRING YOUR VISION TO LIFE

GameTime Landmark Design™ will help you design and create play spaces that tell a community's story and inspire children and families to be active and playful. We work with you to determine your vision for a signature recreation destination, and we combine the right products, materials, and concepts to make your dream a reality.

You're involved in every step of the process from the initial sketches and early models, manufacturing, and installation to ensure the end results exceed your expectations.

DIALS

A PROVEN PROCESS

The success of any project lies in the details. We take painstaking efforts to make sure your dream comes to life exactly as you imagined. We identify goals and objectives, outline a clear plan to achieve them and involve you every step of the way.

1 COLLABORATION

Let's creatively brainstorm and prioritize the desired project outcomes. We'll consider historical, cultural, and educational opportunities, explore accessibility and universal design, and discuss materials to minimize environmental impact.

2 NEEDS ASSESSMENT

Now is the time to determine the best site location and how to secure the property for the project. We'll consider the number of children and adults who will use the space, how to create age-appropriate play, and any special requests. We'll also review the project timeline and budget.

3 PRELIMINARY DESIGN

Let's get input from key stakeholders and community groups, including parents and children, to make sure everyone is heard. We can help you host a design workshop or town hall meeting to brainstorm ideas and hone in on a central theme. This is the perfect time to review the project timeline, sequencing, and budget.

4 FINAL DESIGN

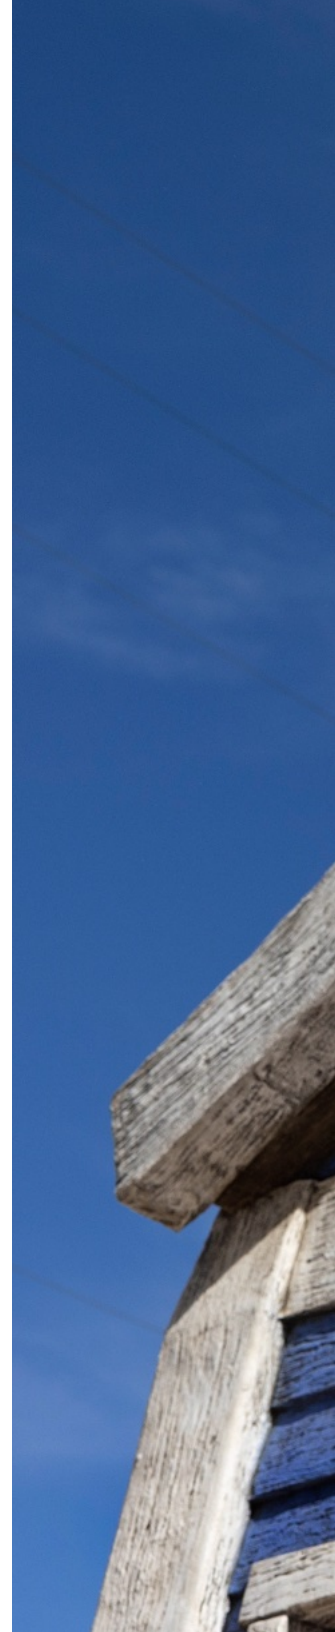

During the preliminary design phase we'll provide early sketches and drawings to help determine the style of your new play space. Now it's time to finalize the concepts. We prepare an interactive look book with renderings and animations so you can see the final design options. This is also when you'll receive a final proposal with budget, timelines, and responsibilities assigned to all parties.

5 FINAL APPROVAL

Once the final design, budget and schedule are approved, it's time to place the order for your materials. Final engineering, including detailed component shop drawings, takes place after the order is placed. On select projects, the approval phase will include scale models or a visit to our design and manufacturing studio for approval of key details.

6 SITE CONSTRUCTION

This is where dreams become reality and you see how all of the planning pays off. We help coordinate an expert team of site contractors, certified playground equipment installers and play specialists to prepare the site, assemble all the components, and bring the play space to life.

Amelia Lou's
Magic Tree House

INDIAN BEACH PARK

Miami Beach, FL

Imagine a playground where the ocean breeze whispers through the sails over a giant, climbable lighthouse. That's exactly what we created at Indian Beach Park in Miami Beach, Florida. Children squeal with delight as they zoom across the ocean on jet ski climbers, their laughter as loud as the waves crashing nearby. We added a lifeguard station with a lookout tower that's perfect for keeping watch or for sunscreen reapplications.

BEACHSIDE RETREAT

This isn't your average playground; it's a fantastical place where imaginative play meets the magic of the Miami seaside. We designed every element to complement the adjacent beach and incorporated plenty of ways for children to explore, socialize, and have fun.

CENTURY PARK

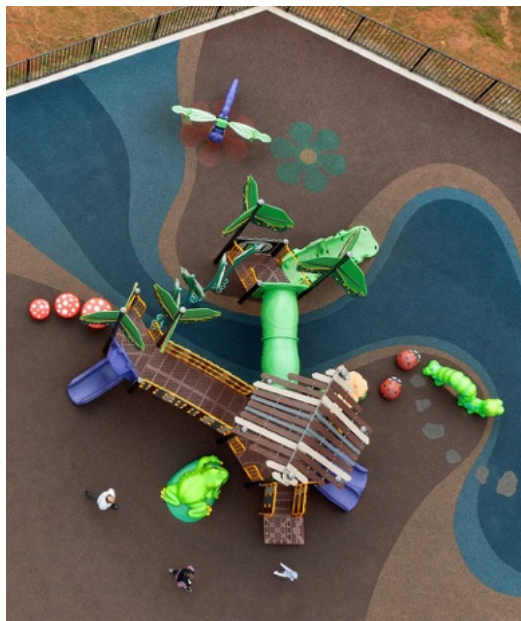

Greer, SC

Kids Planet Playground has long been a community destination for families in Greer, SC. When the community decided to replace an aging wooden play structure with a modern design, they turned to Landmark Design to create a one-of-a-kind play experience that was inclusive, active, and fun.

FOREST ADVENTURES

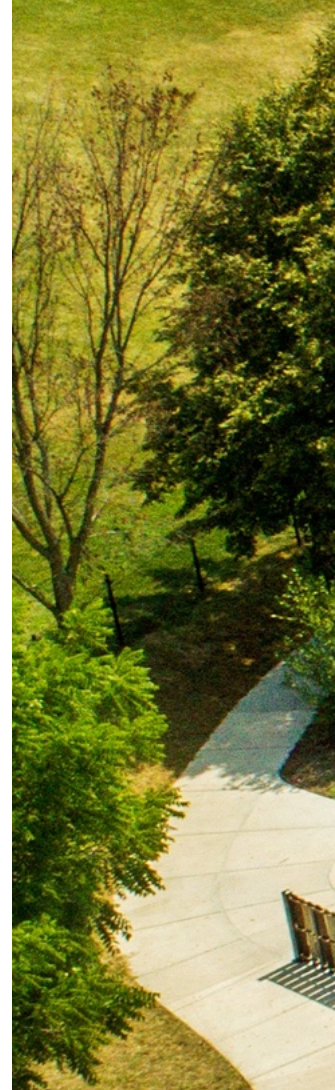

Landmark Design created a play area that complements the natural surroundings with a beautiful nature theme. Children explore rolling hills, climb apple trees, and discover fairy tale castles throughout the play area.

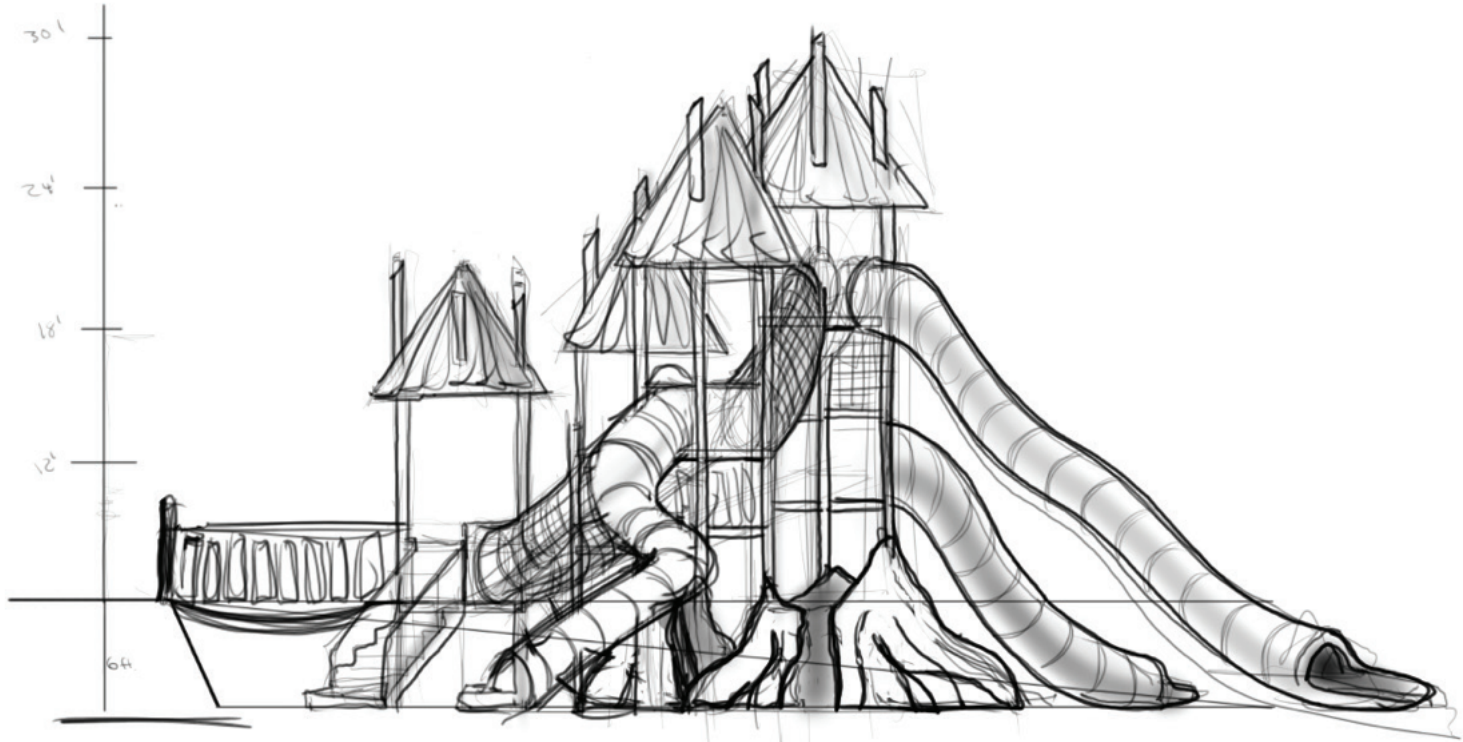

TOUCAN'S HIDEAWAY

West Chicago, IL

Children can climb, slide, and jump in this sprawling wonderland of play. Timbers towers provide a toucan's eye view of the play area and net climbers connect the various sections of the play system for exploration and discovery. The entire play space features accessible poured rubber surfacing.

BUILDING THE VISION

You have a vision for your custom play environment. Our designers work with you to create drawings and renderings to help you see how the space will look before sculpting and manufacturing begins.

SAGE HILLS CHURCH

Wenatchee, WA

The Pacific Northwest theme of this playground was the perfect fit for Sage Hills Church. Designed to complement the adventure theme of the children's ministry building, kids feel like they're walking along a nearby river. Younger kids can enjoy the canoe climbers and fish head stepping stones, while the older kids jog back and forth on the rope bridges suspended over the "river."

PLAY FOR ALL AGES

Families in the Sage Hills congregation have children ranging in age from infants to middle school, so church officials wanted a playground that included some amenities to suit everyone.

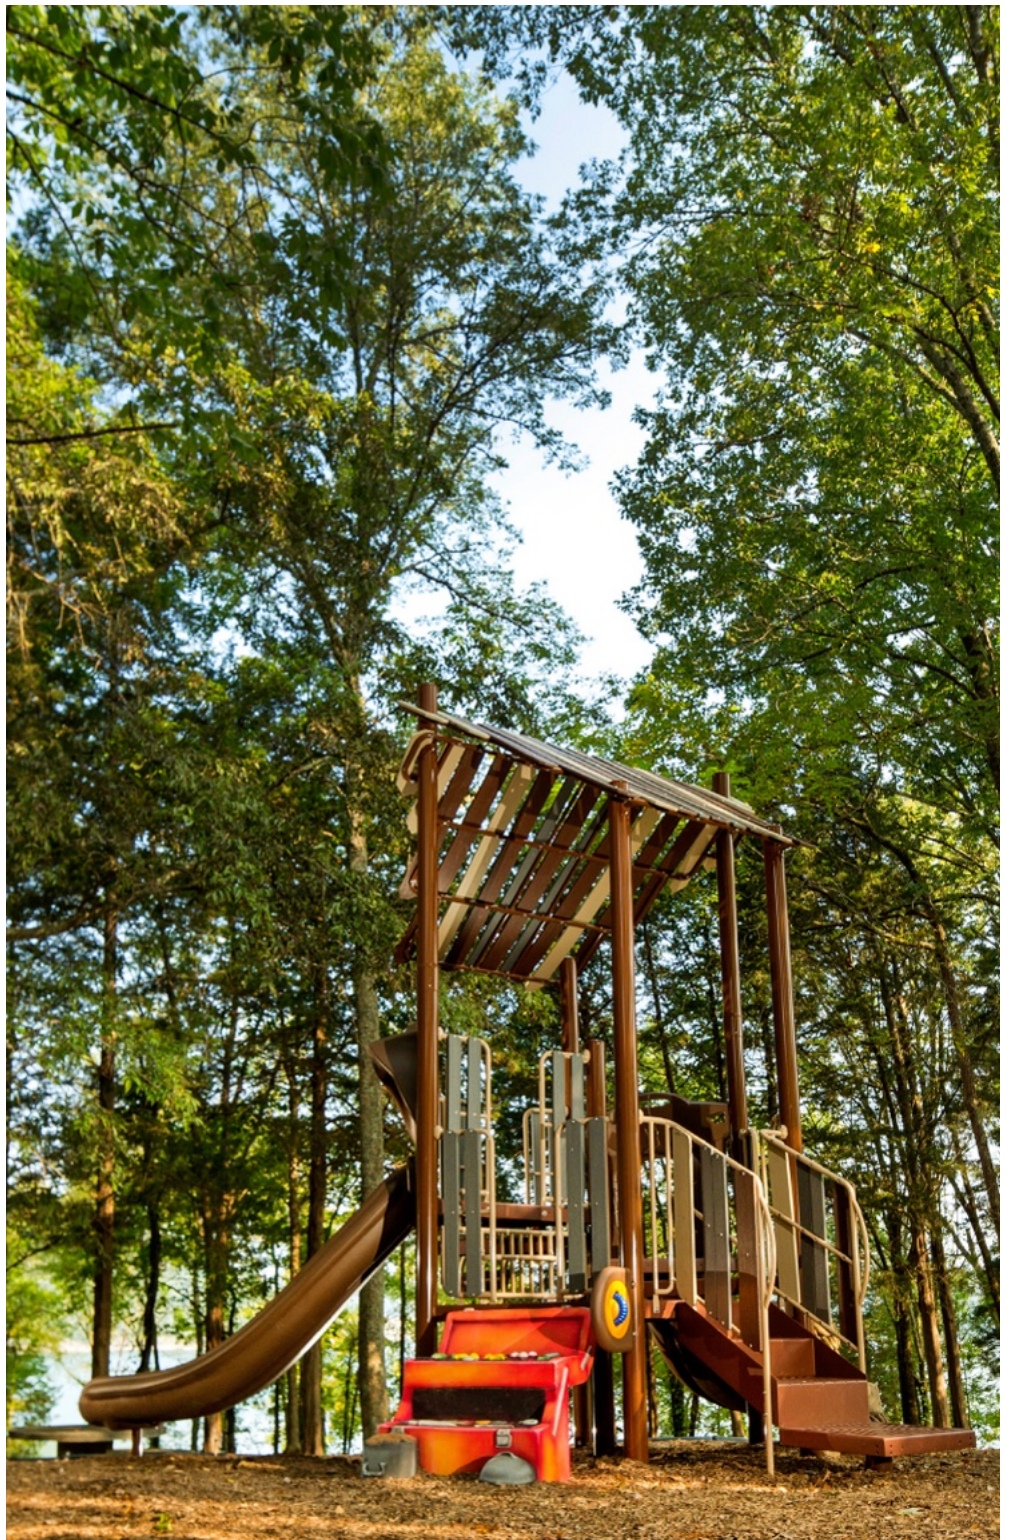

NATURE CONCEPTS

SMITHSONIAN NATIONAL ZOOLOGICAL PARK

Washington, D.C.

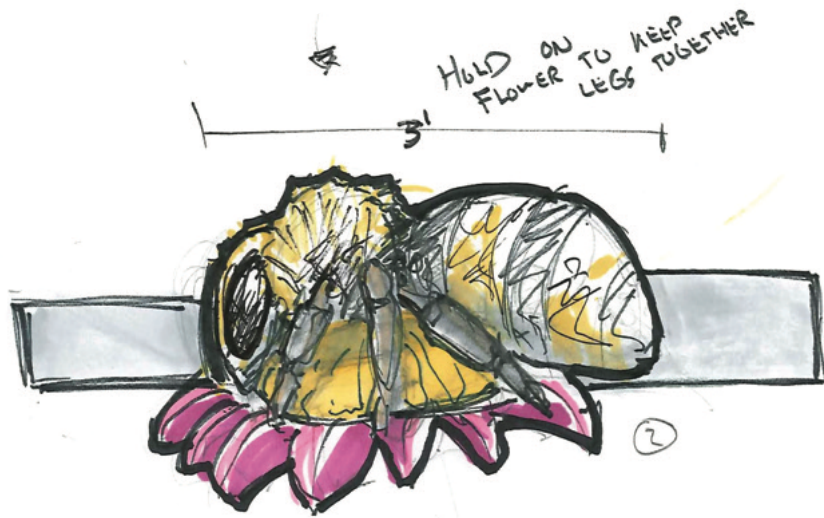

This exquisitely detailed play environment traces a bee's path through a garden and allows children to imagine life as a bee! It features a beehive treehouse, bee and honeycomb climbers, flower garden and themed accessible poured rubber surfacing throughout the play area. Bring the wonders of nature to life with Landmark Design!

Me
and the
Bee

LAND O'LAKES, INC.

GETTING THE DETAILS RIGHT

The goal was to create a play space that was larger than life but still lifelike. It was essential to get the details right and demonstrate how bees live and interact with the environment. We studied the life and habits of bees, worked to understand how children would explore the space, and created drawings and renderings to help the National Zoo curators see their vision come to life. We worked together to find the right materials and components to give children an opportunity to learn and make the learning experience fun and active in a space that encourages children and adults to play together.

Choosing the right materials makes all the difference when creating a custom play space.

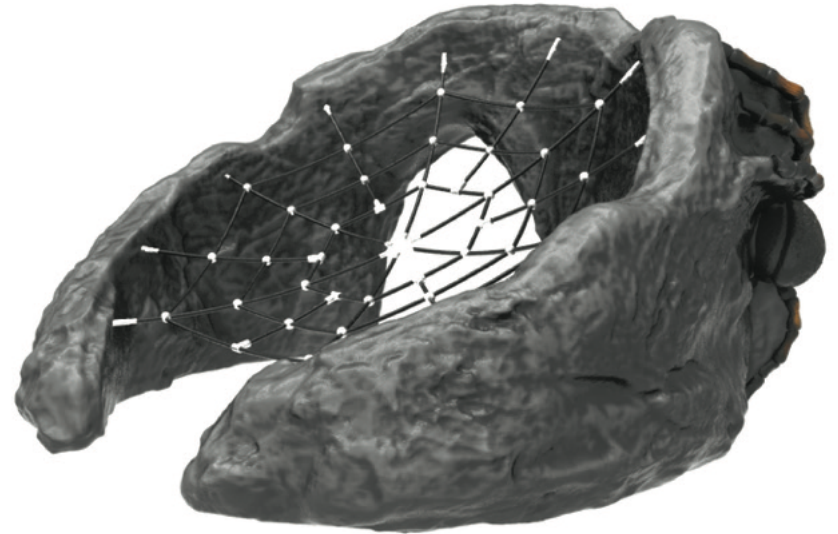

LAKE PLEASANT REGIONAL PARK

Morristown, AZ

Overlooking beautiful Lake Pleasant, this play area combines many hand-sculpted larger-than-life desert animals with standard playground equipment to create a unique recreation destination. It features a gila monster roller slide, eagle and fish net climber, and giant boulders with spiders and turtles. All of it is covered by massive sun shades to keep the area more comfortable on hot Arizona afternoons.

DESERT CONCEPTS

Creating a themed play area begins with designing the individual elements and considering how children will interact with each piece.

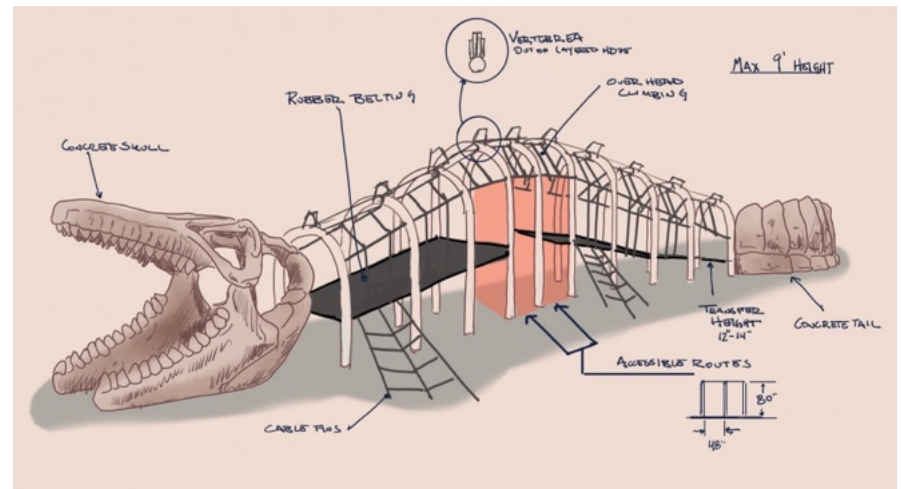

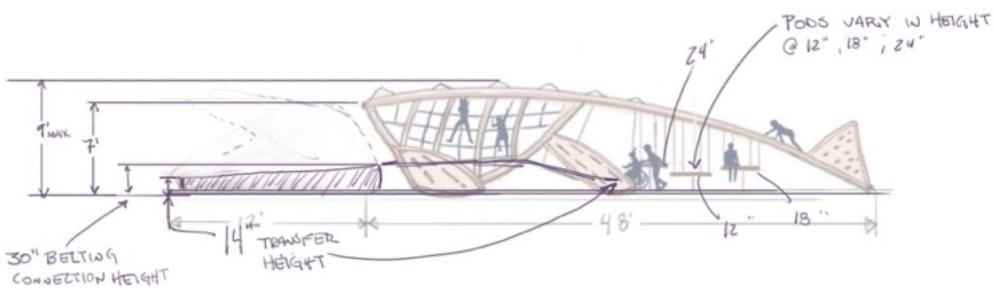

ANIMAL CONCEPTS

TATTAN PARK

Westland, MI

As young explorers embark on their celestial journey, they'll witness the Earth, Moon, and Mars pass beneath their feet, all thanks to our accessible poured-in-place surfacing. These adventurers will then navigate through a landscape adorned with moon rocks, interplanetary creatures, shooting stars, spinning challenges, and even conquer a daring zipline—all in pursuit of reaching our custom themed rocket ship towers for liftoff. This outdoor experience is designed to encourage children of all abilities to explore their surroundings, nurture their imaginations, and embrace the spirit of adventure.

INSPIRING YOUNG EXPLORERS

Few things captivate children as profoundly as the wonders of space travel. At Tattan Park's 'Mission to Mars' playground, young adventurers can embark on a journey through the cosmos, venturing from our very own Earth to far beyond the stars!

ANGEL'S GATE PARK

San Pedro, CA

Angels Gate Park, a jewel on San Pedro's rugged coast, beckons with breathtaking Pacific panoramas. Lush green cliffs, sculpted by wind and time look out toward Catalina Island in the distance. The centerpiece of this beautiful park is the Korean Bell of Friendship. It was presented to the people of Los Angeles by the Republic of Korea to celebrate the U.S. bicentennial, to honor veterans of the Korean War, and to signal the friendship between two countries. Housed in a pagoda-like structure, it serves as the inspiration for the custom playground that lies in its shadow.

INSPIRED DESIGN

We selected colors and crafted custom roofs for this play structure that mimic the look of the pagoda-style monument. The custom surfacing was designed to look like the grass, sand, and sea, that make up the landscape around the park. These personalized touches give the playground a unique style that complements the beauty and purpose of this space.

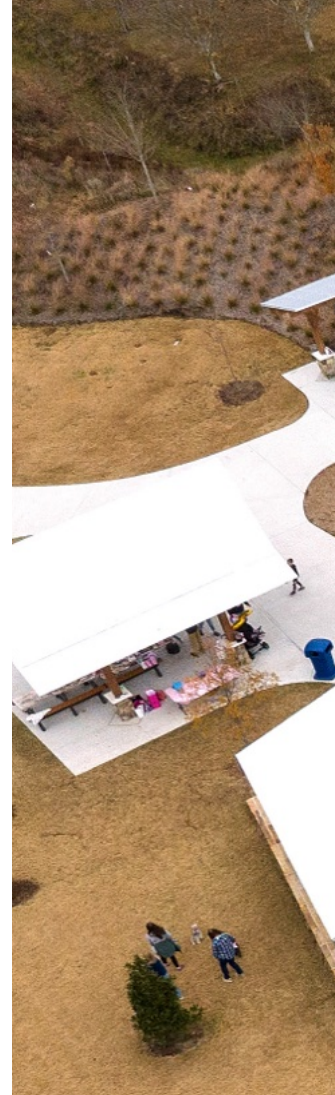

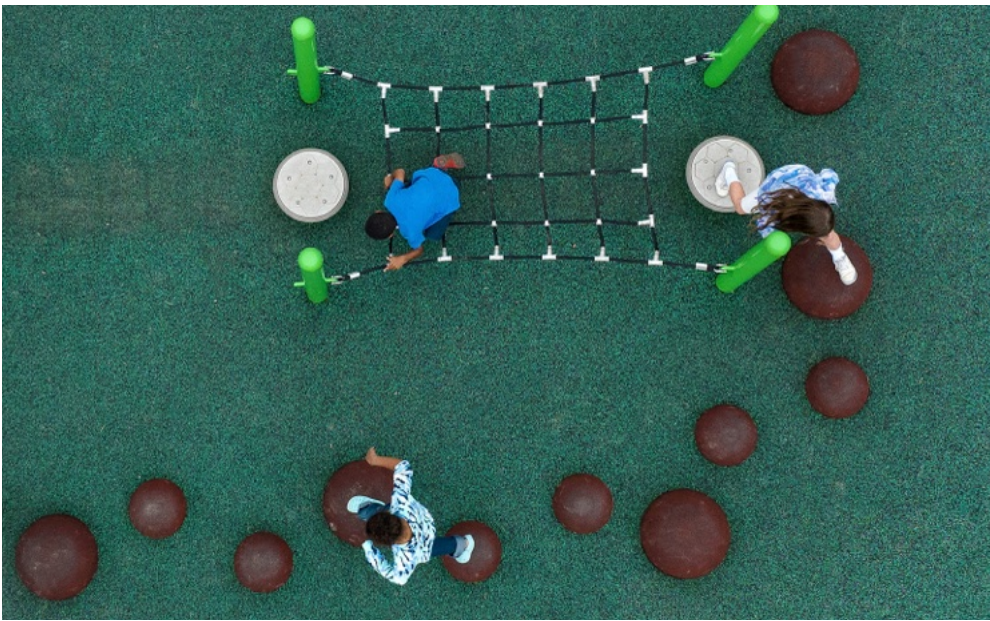

LITTLE DEBBIE PARK

Collegedale, TN

GameTime Landmark Design's design specialists and McKee Foods worked with landscape architects to create a park that's as iconic as its namesake - Little Debbie Park. Filled with custom climbers, musical instruments, and giant Little Debbie snack cakes, this is a park that keeps families coming back for more!

AN ICONIC PLACE TO PLAY

Little Debbie snack cakes are part of many children's fondest memories. Our custom snack cake sculptures are perfect for creating new memories as climb up, over, and around Oatmeal Creme Pies, Cosmic Brownies, and Christmas Tree Cakes®.

INSPIRED BY NATURE

Little Debbie Park is located in a beautiful natural setting, surrounded by giant oak trees and prairie grasses. So, we brought some of those natural elements into the design with giant acorn climbers, a garden space filled with musical instruments, and a sliding hill with custom net climbers.

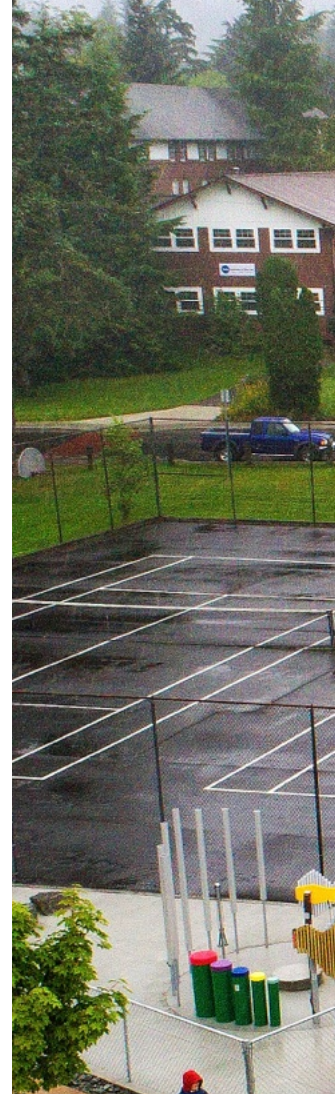

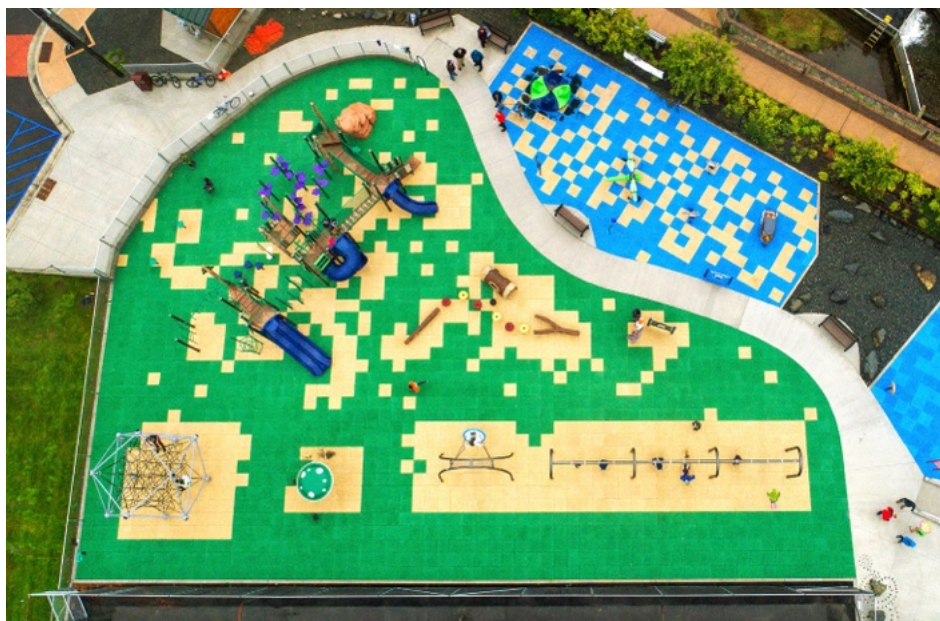

CRESCENT HARBOR

Sitka, AK

The people of Sitka, AK had a dream for an inclusive playground that incorporated their unique story into the play area. Working with Landmark Design and landscape architect Monique Anderson, the dream became a reality! This themed play space inspires activity and active imaginations with playful elements that mimic life from the forest and the sea. It's a place local families love and new visitors fall in love with.

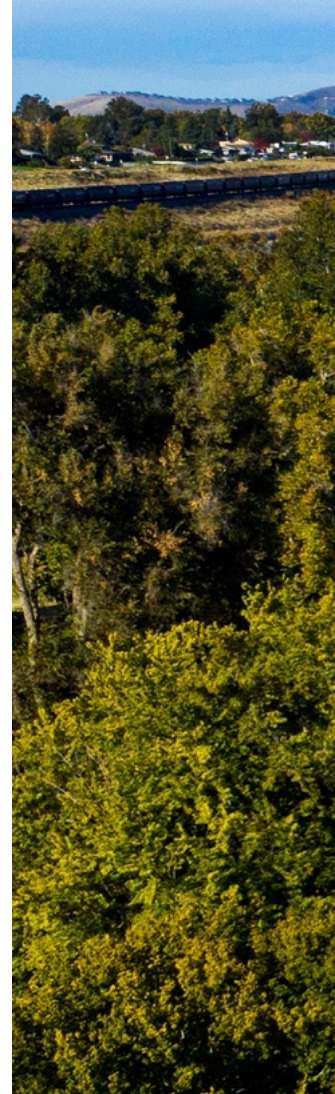

COLUMBIA PARK

Kennewick, WA

Columbia Park is in the heart of the Tri Cities of Eastern Washington and the home of the Tri Cities Water Follies - an unlimited hydroplane race that's been held every year for more than a half century. Thousands of families converge on the park each year to watch the races. The community long dreamed of creating an inclusive playground that reflected their unique geography and culture. Their work with GameTime Landmark Design made it possible for people of all ages and abilities to play together.

ATTENTION TO DETAIL

It all started with the hydroplane. Our designers created a replica climber for children and families to explore during play, and to reflect the adventurous spirit of the community.

EXPLORE HISTORY

Kennewick began its history as a river community but quickly grew into one of the most important western railway hubs. Both modes of transportation are represented on the playground, as well as a climbable lighthouse and bridge-themed accessible ramp to illustrate the unique features of the community.

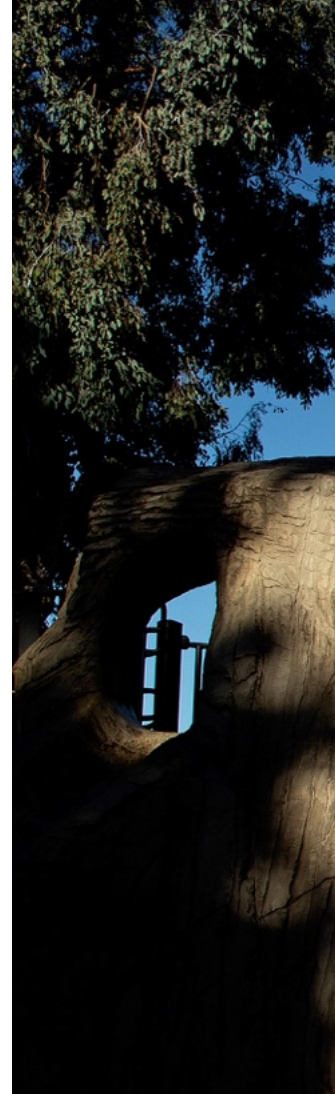

NEALON PARK

Menlo Park, CA

We designed Nealon Park to connect a community with its heritage. The VW bus was virtually the official car of Menlo Park “back in the day,” and Menlo Park has long been recognized as an arborist’s haven with its network of tree canopies throughout the city. We captured these and other elements in this custom play space that is designated a National Demonstration Site for Nature-Based Play and Inclusion.

To learn more about National Demonstration Site status, go to www.gametime.com/nds

HISTORY AND HERITAGE

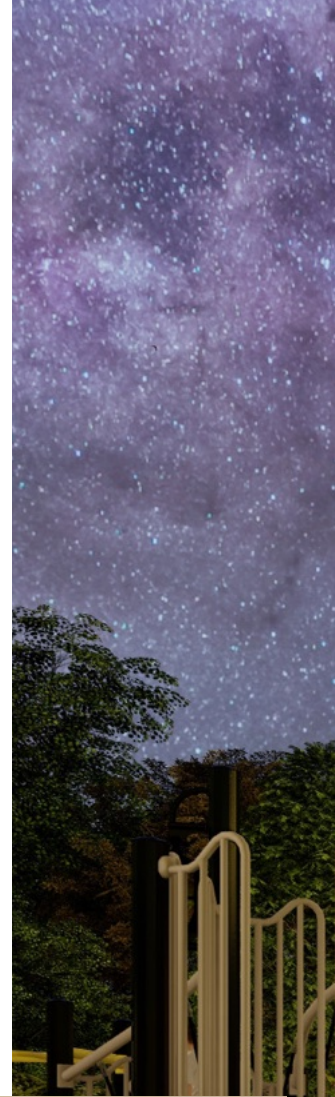

Back in the 60s, the minibus was a mainstay in Menlo Park. People from around the region would camp out under the stars and enjoy the natural surroundings. We captured some of that spirit with a minibus play structure and custom tent and campfire climbers.

CLIMB

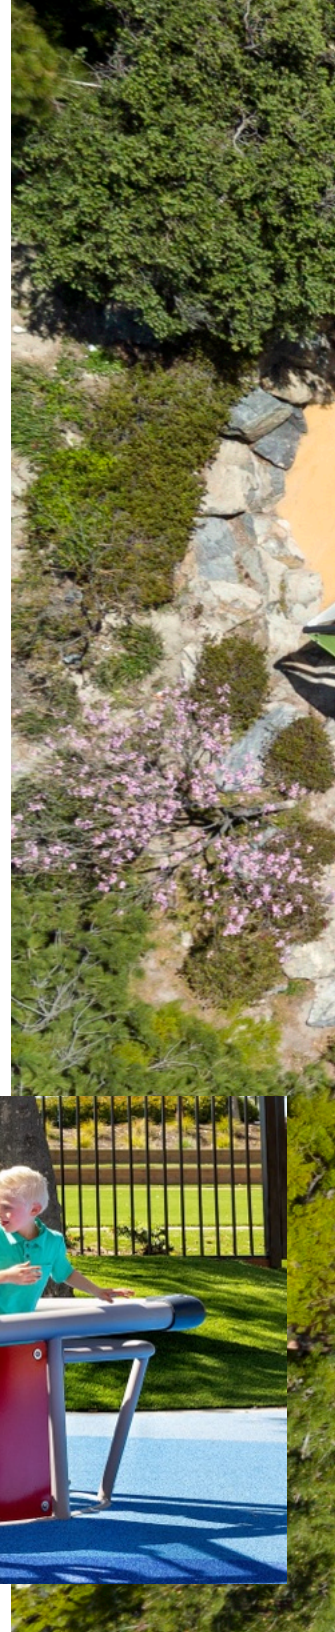

SADDLEBACK CHURCH

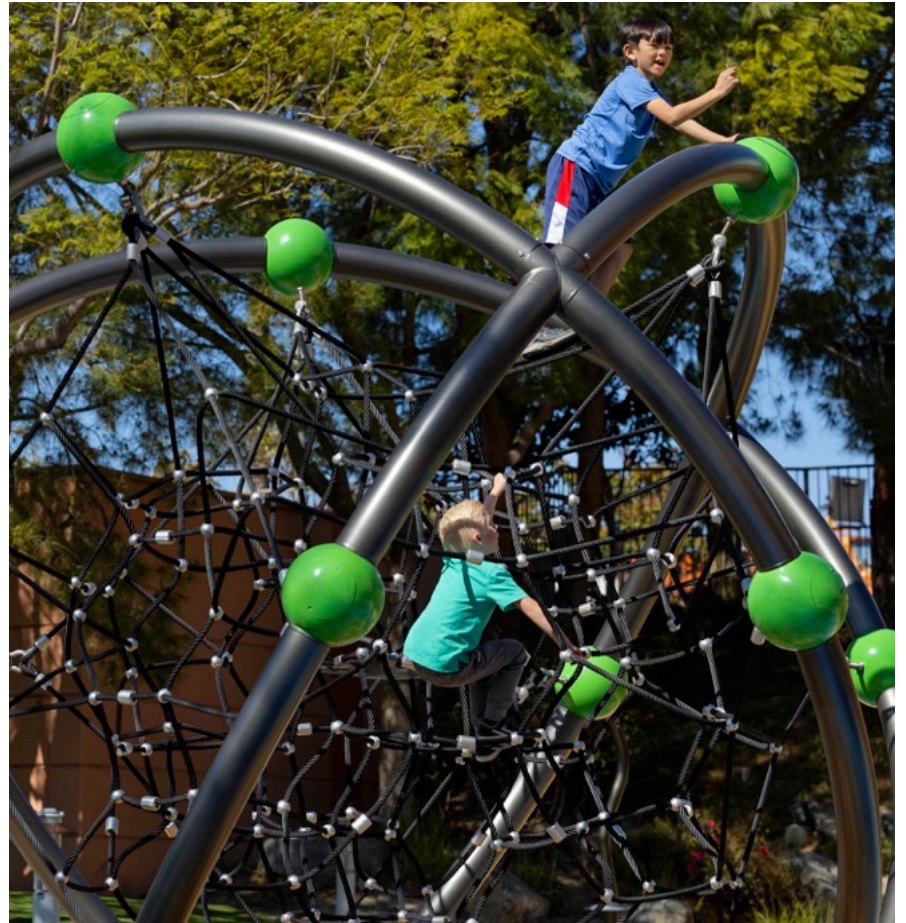

Lake Forest, CA

Saddleback Church has a vibrant children's ministry dedicated to making sure children are known, connected, and empowered. Part of their approach includes creative, interactive spaces where children can learn and explore. The new playground at Saddleback Church is a perfect example of this mission.

Designed as an ocean adventure with custom boats, sea creatures, and islands of play, the new playground incorporates natural elements from the surrounding area in a one-of-a-kind play experience.

PLAYFUL EXPLORATION

The playground includes areas for children ages 2 to 5 and 5 to 12 on playful islands in the midst of the sea. The entire space is covered with accessible poured-in-place rubber surfacing and synthetic turf. Natural stone, plants, and grasses complement the space and create a beautiful and calming atmosphere.

EXPLORE PARK

Hoover, AL

A National Demonstration Site for Inclusive Play, Hoover Explore is a shining example of how a community can create a place where people of all ages and abilities can play together. Designed with input from members of the community, specifically with insights from people who have loved ones with disabilities, the 15,000-square-foot project is a signature destination that draws visitors from hundreds of miles away.

Can You Find Me?

Turtle	Caterpillar	Ladybug
Owl	Leopard	Magpie
Butterfly	Lizard	Frog

Wooden bookshelf with books and green beanbag chairs.

FANTASY, MEET REALITY

We created many custom elements to make this a unique and visually stunning place for families. A custom entryway greets people as they arrive; themed swings and an accessible multi-tiered clubhouse are among the many custom features.

COMMUNITY VITALITY

As a National Demonstration Site, this playground is part of a data collection initiative to determine how the park is being used and the impact it makes in the lives of families.

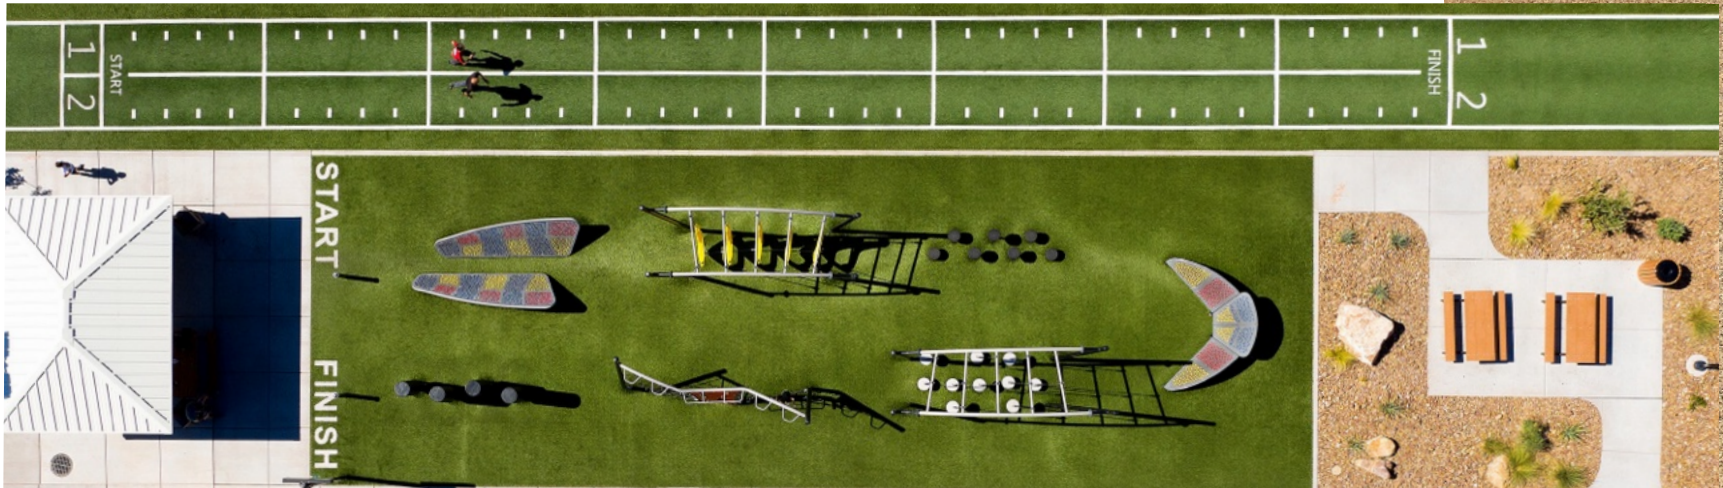

To learn more about National Demonstration Site status, go to www.gametime.com/nds

CANYON PARK

Washington, UT

Within the canyons of Southern Utah is Canyon Park. Our Landmark Design team worked with landscape architects to embrace the natural environment and create a terraced play environment that utilizes the unique topography. At the top of the park is a Challenge Course for family fun and competition. Along the massive hillside is a set of dual tube slides installed in poured-in-place rubber surfacing with custom net climbers to help children ascend the hill. At the base of the park is a sand play area with natural boulders connected with our VistaRope® cables for more climbing adventures.

ACTIVE PLAY

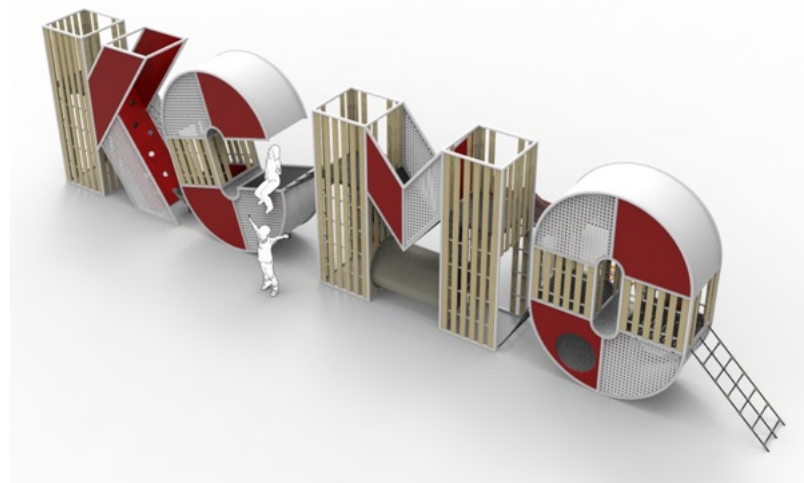

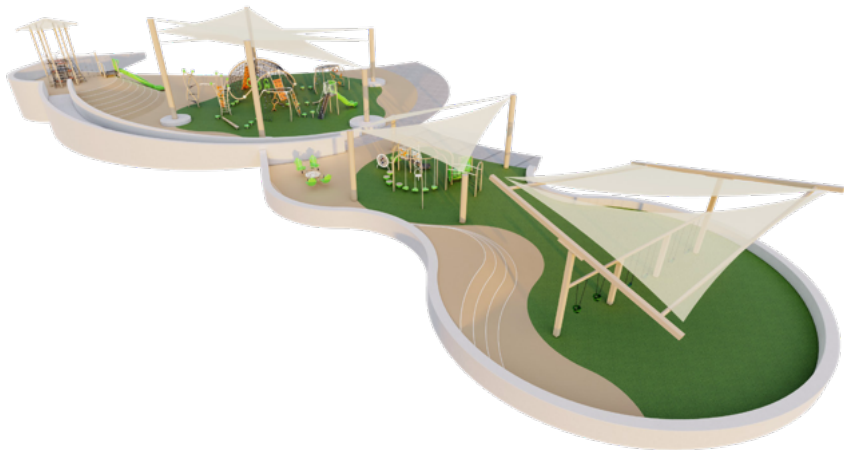

From the Challenge Course to the hillside ropes, there are plenty of fun, innovative ways for children and families to stay active at Canyon Park.
